<sup>++</sup>NOTE:

Due to minor size variations to the tank, the ICN Riser Manifold may need to be cut to size. Place at the bottom of the empty tank, center and cut level where the top of the tank or grey bushing meets the control valve. Cut level, sand off any burr or rough spots and sand or round off outside edge of the riser.

WARNING:

For adjusting the height of the ICN Riser Manifold, follow instructions and do not cut short.

\*\*NOTE:

Due to weight for all 1465, 1665, 1865 and larger systems, completely assembled replacements are not available. See kits above. Tanks for these systems can be sold and shipped separately.

\*\*NOTE:

Minor size variations to the tank or leveling base may require an adjustment to existing plumbing &/or cover. Flexible piping is required which would easily facilitate any adjustments.
